To Whom It May Concern,

I am writing to recommend Kasun Prabath for the Machine Learning Engineer position at Amazon. I had the pleasure of knowing Kasun during his time as a student at the Department of Information Technology at the University of Sri Jayewardenepura.

Kasun was a keen student with a strong aptitude for computer science. He graduated with first class honors, and during his time at university, he held the position of president of S@IT, the university's student IT society. In this role, he was responsible for organizing and running a number of successful events, including the annual IT fair and the hackathon.

Kasun is also a talented software developer. He has won several national and international awards for his work, including the first prize in the ACM International Collegiate Programming Contest. He is also the co-author of a number of academic papers on machine learning.

In addition to his technical skills, Kasun is also a highly motivated and results-oriented individual. He is always willing to go the extra mile, and he is always looking for new challenges. He is also a team player who is able to work effectively with others.

I have no doubt that Kasun would be an asset to your team. He is a highly skilled and motivated individual with a proven track record of success. I highly recommend him for the Machine Learning Engineer position at Amazon.

Sincerely,

Prof. K.S. Lasith Gunawardena
D. Eng., M.Sc., B.Sc., SMIEEE, FBCS, MCS
Professor and Head, Department of Information Technology,
University of Sri Jayewardenepura.
