Dear Admissions Committee,

I am writing to recommend Dinuka Wijesundara for the Data Science Master's program at Harvard University. I have known Dinuka for the past three years, as his professor in the Data Science program at the University of Colombo.

Dinuka is an outstanding student with a deep passion for data science. He has a strong foundation in mathematics, statistics, and computer science, and he is always eager to learn new things. Dinuka is also a highly motivated and independent learner. He is not afraid to take on challenging projects, and he is always willing to go the extra mile.

In my class, Dinuka consistently scored at the top of the class. He was always the first to volunteer to answer questions, and he was always willing to help his classmates. Dinuka also had a knack for explaining complex concepts in a clear and concise way.

One of Dinuka's most impressive qualities is his creativity. He is always coming up with new ideas for data science projects. He is also very good at applying data science to real-world problems. For example, he recently developed a data-driven model to predict the likelihood of customer churn for a local bank.

I have no doubt that Dinuka would be an asset to your program. He is a bright, motivated, and creative student with a passion for data science. I highly recommend him for admission to the Data Science Master's program at Harvard University.

Sincerely,

Prof. K.S. Lasith Gunawardena
D. Eng., M.Sc., B.Sc., SMIEEE, FBCS, MCS
Professor and Head, Department of Information Technology,
University of Sri Jayewardenepura.
